

POND ANIMALS WORKSHEET

Name:

Date:

There are many types of invertebrates. Some have no legs, some have 6 legs and some have many legs. This can be very helpful in identifying the animals that you find.

1) When you have caught some animals look at each animal closely and try to identify them using the number of legs to help you. Then fill in the table

Name of creature	No legs	Six legs	More than six legs	Number found
Pond Snail				
Water Flea				
Leech				
Water Boatman				
Water Louse				
Tadpole				
Freshwater Shrimp				
Pea Mussel				
Mayfly Nymph				
Dragonfly Nymph				
Bloodworm				
Flatworm				
Water Mite				

2) Which creature have you caught the most of?
